

Why your Start-Up needs an Accountant!

#1: All of the confusing accounting terms

There is over a 1,000 accounting terms and you as a start-up could use the professionals to help with this.

#2: Deadlines you may not even be aware of

Your business may have all sorts of deadlines, from HST and Payroll filing to submitting your corporate tax return and everything in between. An accountant can be great help to organize these deadlines to avoid any tax penalties, or worse!

#3: Tax Planning to avoid long term issues

Not only do accountants do your taxes, they also help plan in advance to avoid long-term issues and to provide the most efficient and effective accounting structure to promote your business' bottom line.

#4: Handling the unique accounting rules your unique business may be required to follow

Every business is unique, and your start-up is no different! Every day new rules and regulations come into effect which could affect your business. Let the accountants keep up with the changing rules and you focus on your business!

#5: Trusting non-certified individuals to deal with your sensitive information

You need someone you can trust to deal with your business' information. Certified Professional Accountants have spend years with education and training, including yearly education to keep them up to date with the ethics and morals that comes with the accounting field. Your information is safe with professional accountants!

Final:

When you look at the common denominator in the points we have listed, the answer is time management! We can save you the time and stress so that you can put your focus into your business! Think about it, are hours of stress and confusion worth it when you could hire an accountant to complete the task in fraction of the time?
